

What's New in TouchBistro 9.1.3

We've launched TouchBistro Online Ordering. You can start accepting commission-free online orders today by following our quick and easy digital onboarding in your Cloud account.

We've also added two new Online Ordering Aggregator partners: Ordermark and Deliverect.

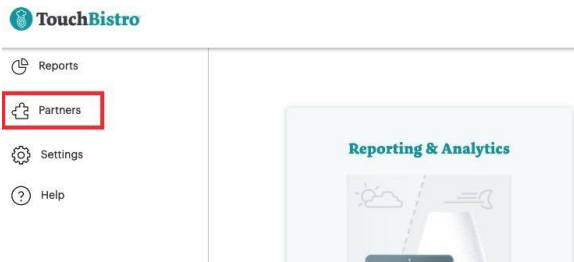

Consult these releases note for further details about these changes and more.

Email support@touchbistro.com if you are experiencing any issues with this update.

TouchBistro Online Ordering

TouchBistro now offers an easy way to add online ordering capabilities to your web site or Facebook page.

To get started, log into your Cloud Portal and click **Partners**. You'll see an option for **TouchBistro Online Ordering**. Click that to enable online ordering for your venue.

Once enabled you will be able to set up your online ordering page and configure key settings.

Order Online

```
<a href="https://order.tbdrive.com/tb-karltemplate2?src=3" target="_blank"></a>
```

Order Online

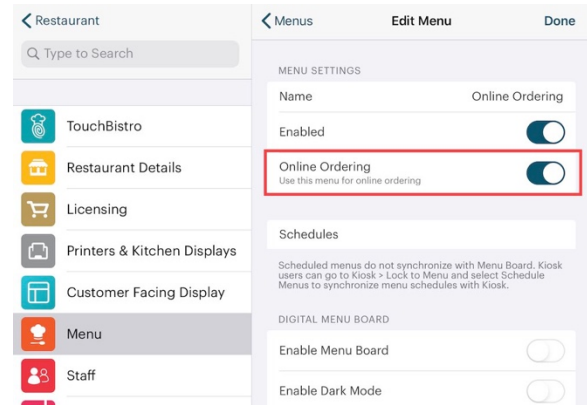

```
<a href="https://order.tbdrive.com/tb-karltemplate2?src=3" target="_blank"></a>
```

Once configured, your TouchBistro Online Ordering set up will generate HTML code you can insert in your web site, which displays a launch button.

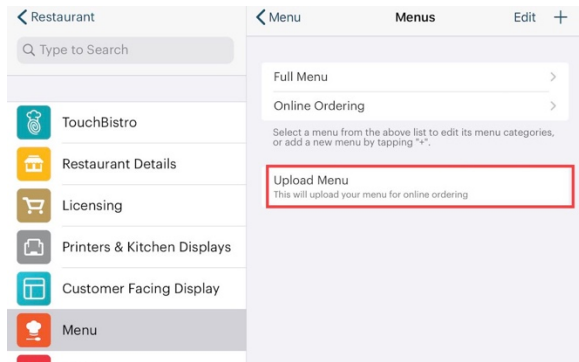

<https://order.tbdrive.com/tb-karltemplate2?src=3>

Preview

It also generates a unique URL for your online ordering page, which you can display on your restaurant's Facebook page.

You will also want to create an online ordering **Menu** (**Admin | Admin Settings | Menu | Menus**) and add items you want to make available for online ordering.

You would then upload your menu.

Making Changes to your Menu

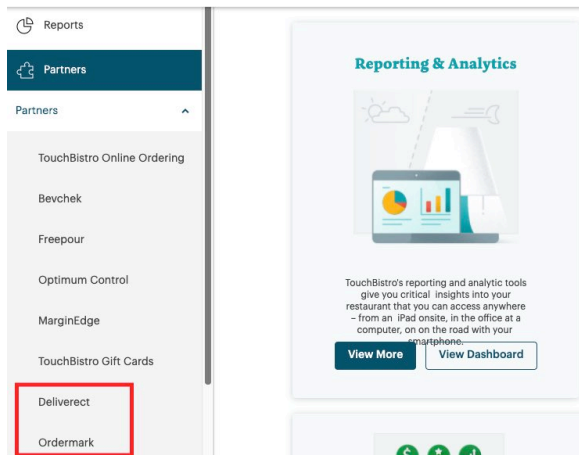

In TouchBistro 9.1.3, you no longer have to re-upload your menu if you make changes to your **Menu**, your **Menu Category**, or any **Menu Item** settings.

General Online Ordering Changes

We've made several changes to online ordering. These changes apply to both TouchBistro Online Ordering and our Online Ordering integrations.

New Integrations

We now integrate with two new Online Ordering Aggregators: Ordermark and Deliverect.

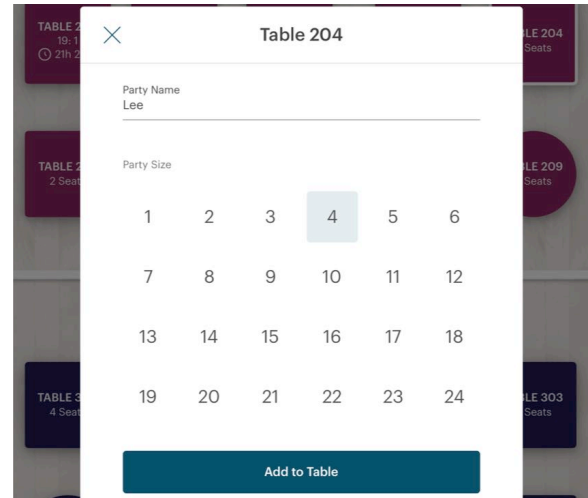

Similar to Checkmate and TouchBistro Online Ordering, these can be enabled from your TouchBistro Cloud Portal under the **Partners** menu.

Ordermark is available to customers in the USA and Canada. Deliverect is available to customers in the UK and Canada.

Incoming Online Alert

If you are not on your **Online Ordering** tab, TouchBistro POS will now ping your iPad (or any iPad with notifications turned on) every five seconds until the Online Ordering tab is opened.

Add to Table Dialog

We've changed the look of the **Add to Table** dialog box. However, the functionality remains the same.
