

What's New in TouchBistro 9.2.0

TouchBistro (USA/CA) now integrates with Push Operations. The KDS now supports menu item notes entered by the diner when using online ordering.

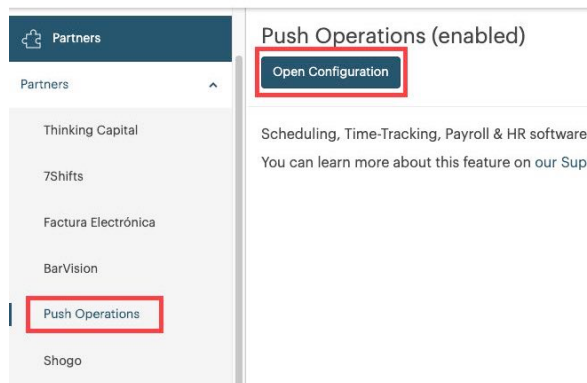

Consult these releases note for further details about these changes and more.

Need More Help?

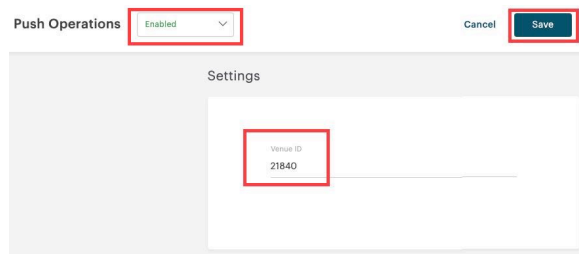

Email support@touchbistro.com if you are experiencing any issues with this update.

Push Operations Integration

TouchBistro users in USA and Canada can now integrate with Push Operations. Push Operations is a cloud-based app that integrates scheduling, time-tracking, payroll, and HR into one easy-to-use platform. After signing up with Push Operations, you can enable the integration via your Cloud portal.

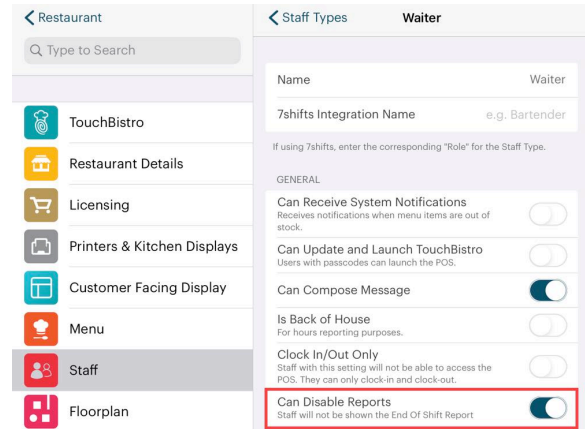

Click **Partners** and **Push Operations**.

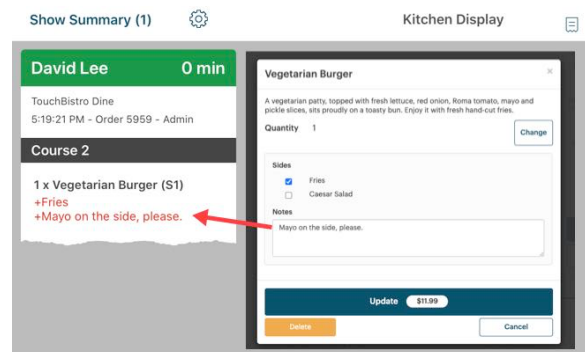

Select **Enable** from the drop-down box and copy your venue ID. Pass this to your **Push Operations** account manager. Click **Save** to exit.

Staff Types' Can Disable Reports Permission

Can Disable Reports has been moved to the **General** section of **Staff Type** permissions. If enabled, the staff member will not be able to see or generate his/her own shift reports.

Online Ordering and the KDS

The KDS will now display menu item notes entered by customers via online ordering (e.g., TouchBistro Online Ordering).

Bevager/Foodager Integration Has Been Renamed Craftable

The Bevager/Foodager bar management integration has been renamed Craftable.
