

What's New in TouchBistro 9.2.5

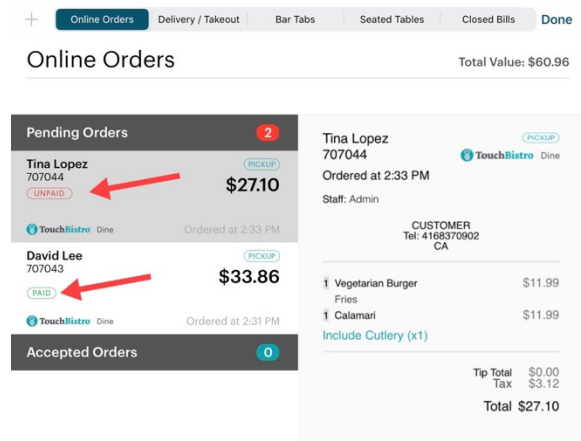

Canadian users of TouchBistro Online Ordering will now see flags in the Online Ordering tab to indicate if the order was paid online or if the customer indicated payment on pickup/delivery. If you are a Canadian user using the Chase Merchant Services integration, we've modified the look of the setup screen.

Consult these releases notes for further details about these changes and more.

TouchBistro Online Ordering Online Payments (Canada)

The screenshot shows the 'Online Orders' section with a total value of \$60.96. Under 'Pending Orders', there are two orders: Tina Lopez (707044) for \$27.10 with an 'UNPAID' flag, and David Lee (707043) for \$33.86 with a 'PAID' flag. Red arrows point to these flags. The 'Accepted Orders' section shows 0 orders. The right side of the screen displays customer details for Tina Lopez, including her phone number, order time, and a list of items: Vegetarian Burger (\$11.99), Fries (\$11.99), and Calamari (\$11.99), plus a \$3.12 tax and a \$0.00 tip, totaling \$27.10.

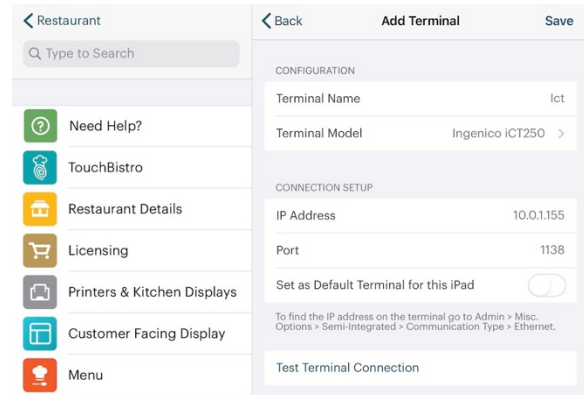

If you are using online payments with TouchBistro Online Ordering, orders in the Online Ordering tab now have small flags indicating whether or not the order was paid online. Paid indicates the order has already been paid and there's no need to collect payment. Unpaid indicates the diner has optioned to pay for the order upon pickup or delivery.

Chase Merchant Services (Canada)

The screenshot shows the 'Chase Merchant Services' setup screen. It features the Chase logo and a 'Manage Terminals' button. Under 'MOBILE TERMINAL SETTINGS', there is a toggle for 'Auto Close Table After Payment' which is currently turned on. A note below states: 'This setting only applies to iWL220 and Move/5000 terminals.'

We've redesigned the Chase Merchant Services setup screen.

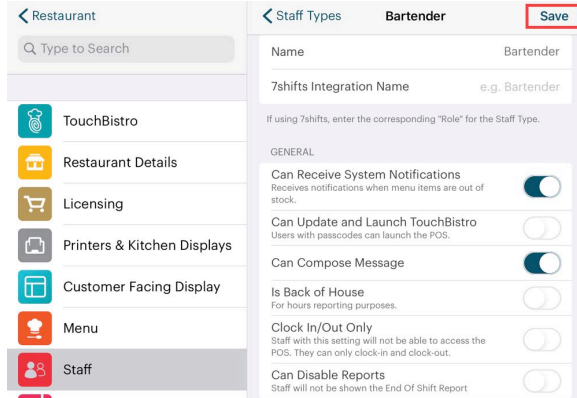

The screenshot shows the 'Add Terminal' screen. It includes a search bar and a list of menu items on the left. The main area is titled 'CONFIGURATION' and contains fields for 'Terminal Name' (lct), 'Terminal Model' (Ingenico iCT250), and 'CONNECTION SETUP' with fields for 'IP Address' (10.0.1.155) and 'Port' (1138). There is a toggle for 'Set as Default Terminal for this iPad' and a 'Test Terminal Connection' button.

If you need to edit or add a new device, adding a terminal no longer invokes a pop-up screen.

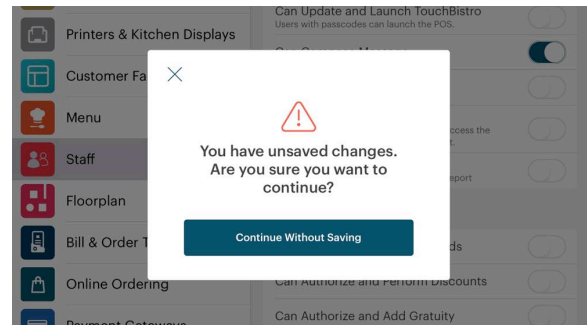

New Terminal Models

We now support new countertop and tableside payment terminals. You will see these in the **Add Terminal** screen's terminal list. The Desk/5000 is a countertop terminal. The Move/5000 is a mobile Wi-Fi terminal that can be used tableside.

Staff Screens Now Prompt You to Save

Screens under **Admin | Admin Settings | Staff** now have **Save** buttons.

If you make changes and try to exit the screen without saving, TouchBistro will warn you. Tap **Continue Without Saving** to abandon your changes or tap the **X** button to return to the screen so you can tap **Save**.
