

What's New in TouchBistro 9.2.6

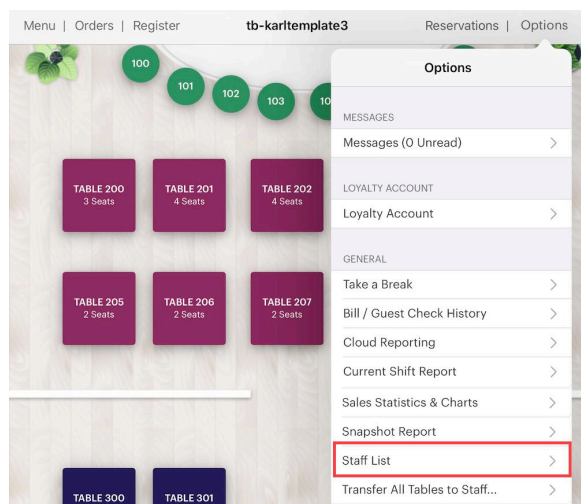

In 9.2.6, we complete our cycle of changes to staff management screens, updating their look and streamlining function.

Consult these releases notes for further details about these changes and more.

Staff List

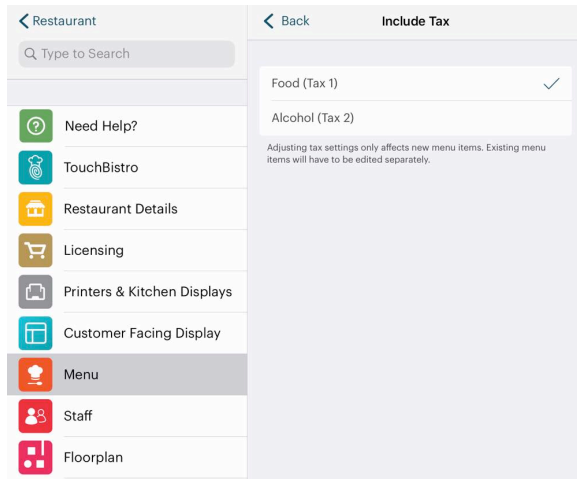

Managers can view and manage staff using the **Staff List** option under **Options**.

In 9.2.6, we've made a few design changes to this screen. There are three minor functional change to streamline this screen's functionality:

1. We've removed the ability to view archived staff members. Archived staff members can be viewed/managed from the Admin's **List of Staff** screen.
2. We've removed the Admin account's appearance on this list. If the admin wishes to change his/her passcode, access the Admin account on the Admin's List of Staff screen.
3. Clocked-in staff members are grouped at the top. You no longer have to filter on clocked-in staff members.

Setting Default Tax for a Menu Category

If you set a new tax for a menu category, the **Include Tax** screen will now be "inline" and no longer pop up a selection screen. Tap < **Back** to return to the menu category.

New Alert Sound for Online Ordering

We've made the alert sound for incoming online orders louder and more distinct.
