

## What's New in TouchBistro 9.2.8

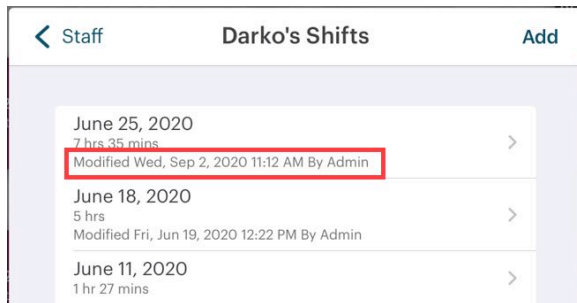

If a staff shift gets edited, the shift will now display who did the edit and the date/time of the edit. If you are using online ordering, we've removed the three hour auto close feature.

Consult these releases notes for further details about these changes and more.

### Need More Help?

Email [support@touchbistro.com](mailto:support@touchbistro.com) if you are experiencing any issues with this update.

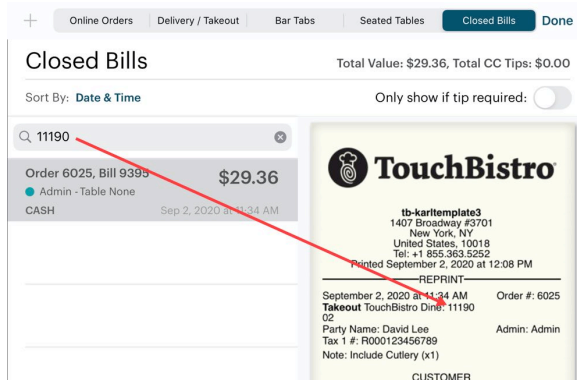

## Manually Editing Shifts Indicates Who Edited the Shift and When

If a manager or Admin edits a shift via **Options | Staff List**, the edited shift will note who made the adjustment and the day/time the adjustment was made.

## Online Ordering

### Search Close Bills by Online Order Number

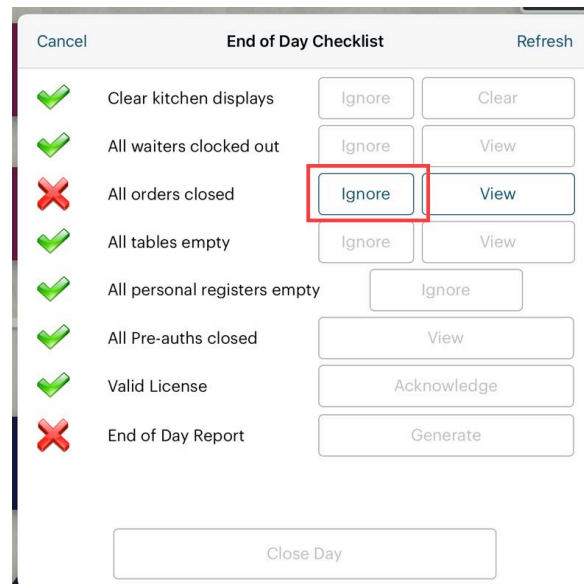

If you need to find a specific bill by its online ordering number (generated by TouchBistro Online Ordering or a

third-party online ordering service) in the list of closed bills, you can now search on the specific order number.

## Accepted but Not Completed Orders No Longer Auto Close

Previous to 9.2.8, if you accepted an online order but did not complete the order (e.g., take payment for the order), TouchBistro would auto complete the bill after three hours. We no longer autocomplete bills.

If you're leaving accepted bills under your **Online Ordering** tab and you want to close your day, you will need to tap **Ignore** next to **All orders closed** on your **End of Day Checklist**.
